## DETAILED ACTION

### *Election/Restrictions*

1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-36, drawn to configuring the communication for storage devices, classified in class 710, subclass 104.

Group II, claim(s) 37-40, drawn to an apparatus for controlling I/O operations over a storage device, classified in class 710, subclass 100.

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be practiced in firmware or be practiced without any device modules.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

3. Examiner tried to telephone the Applicant's Representative 9/21/05 for an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2111

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
